

# SOS Intelligence

Single Operating Systems

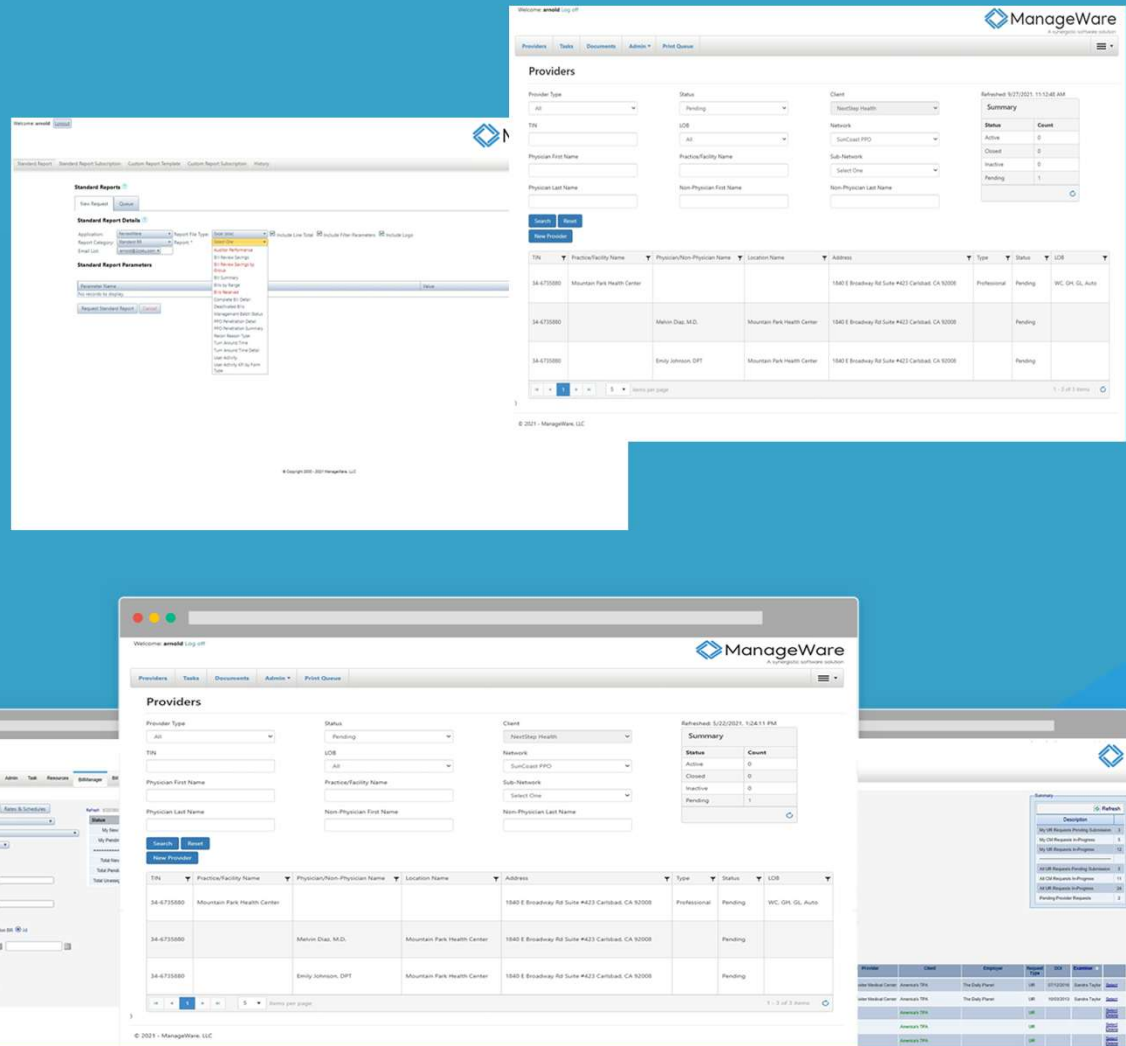

# ManageWare

A synergistic software solution

# Our Mission

ManageWare brings a unique perspective and innovative technology to the vastly underserved Workers' Compensation Claims Administration and Medical Managed Care markets. Our mission is to shift the paradigm with respect to claims handling and managed care technology by offering the market's first fully integrated Claims Management, Bill Review, Utilization Review and Provider Network Management software suite. We are committed to achieving maximum savings for our client partners by leveraging leading edge technology.

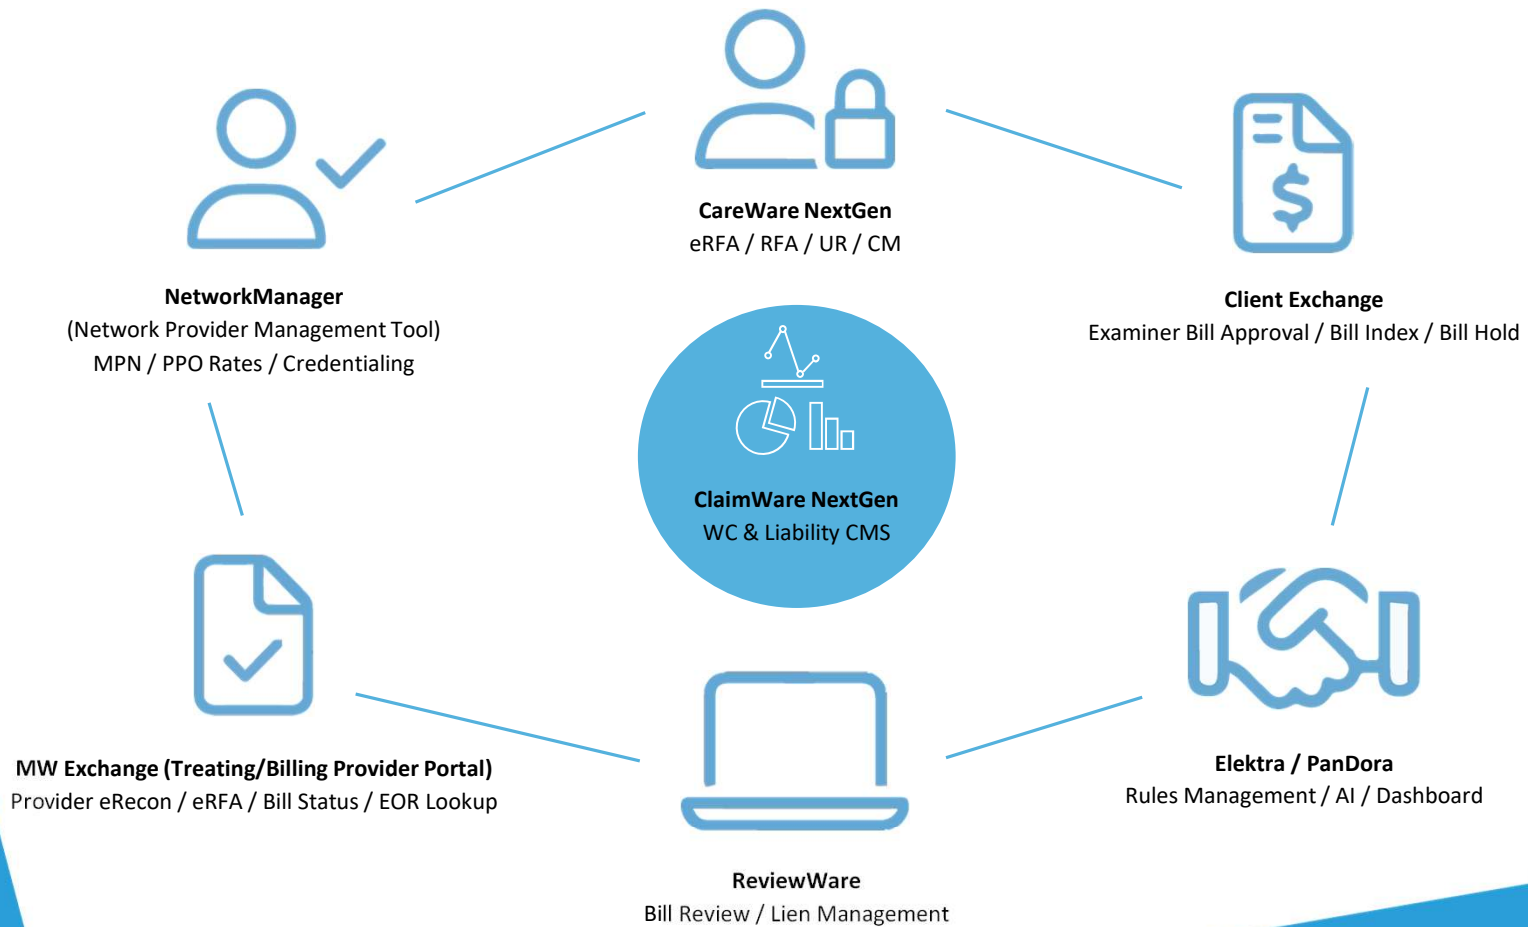

# Our Technology

- ❑ Internally developed by ManageWare staff
- ❑ 15+ years of WC Experience
- ❑ Proven scalability
- ❑ State of the art Microsoft based platform on Azure Cloud
- ❑ Experienced IT team with an emphasis on enterprise system integration
- ❑ SOC 2 + HITRUST Type 2

# ManageWare's Software Ecosystem

## Real Solutions for **Municipalities**, School Districts, JPA and others facing tighter or reduced budgets.

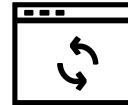

### **Cost Savings**

- Eliminate cost of building and maintaining EDI between multiple vendors.
- Better vendor management by reducing the number of vendors needed to connect and share data between all the processes.
- Single Source Technology Solution

### **Added Values**

- No lost or delay in process due to vendor implementation cost and timeline.
- Implement new ideas or enhancements to the WC program quicker.
- Elimination of “Pend and Transmit” flat-file EDI between multiple vendor partners

### **Added Benefits**

- Real time updates on all information across the ecosystem such as claims and vendor data... no more waiting for daily EDI's to run.
- URO's have full visibility to claims data without having to access the claims system.
- Sharing of all claims information from status, notes, financials, bill review & UR results, etc..
- Sharing of provider MPN status to improve bill review results.
- Reduce the hours needed to troubleshoot EDI issues due to multiple vendors needing to investigate and research.
- No need to access multiple vendor portals.
